

What's New in Digital Editions?

The Choices Program launched Digital Editions in 2018. Since then, we have continually updated Digital Editions to best serve teachers and students based on user feedback. Look for more updates coming soon as we continue to make improvements and respond to customer feedback. Recent updates include:

Chatting with Choices

Replaced Online Office Hours with Chatting with Choices, an informal virtual hangout for Choices users to ask questions, chat about best practices, and more! (July 2022)

Improved Navigation

Added improved navigation marker for teachers. The left-hand navigation will now bold and bullet the unit section a teacher is currently viewing. Since the teacher view is more segmented than the student view, the marker will help teachers navigate through the sections. (March 2022)

Copy Student Link

Released a Copy Student Link tool for teachers to share links to specific parts of a unit rather than just one link for the whole unit. (November 2021)

Check/Uncheck All Button

Created a Check/Uncheck All button to streamline the process for teachers to select what content they want their students to access. (August 2021)

Teacher Notes Updates

Expanded the Teacher Notes capabilities. Now teachers can add notes to all handouts (study guides, key terms, lesson handouts, etc.) in addition to the student readings. (May 2021)

Automated Emails

Created an automated email for all new Digital Editions users that includes tips for using Digital Editions, so that teachers can take full advantage of the features. (May 2021)

Automated Ordering

Automated our ordering system. Now when you purchase Digital Editions, your account is set up immediately and there is no need to wait for our staff to do it for you. Make your purchase and get started right away! (March 2021)

Instructional Videos

Produced three instructional videos to help teachers and administrators understand how Digital Editions works. (March 2021)

Teacher Orientation

Set up a Teacher Orientation page for each unit that allows teachers to see an overview of all the content in a unit as soon as the unit is opened within a class. This should be especially helpful for teachers as they consider what content to assign to their students. (March 2021)

Login Button

Added a Digital Editions User Login button on our website to make it easier for teachers to get to their accounts. Look for the red button in the upper left corner of the website. (March 2021)

Online Office Hours

Added monthly Online Office Hours for teachers and administrators to ask any questions they may have about our curriculum, whether digital or print. (July 2020)
